2.5 MILLION COVID VACCINATIONS CARRIED OUT IN FRANCE AS OF 10 FEBRUARY 2021

MINISTER OLIVIER. VERAN GETS VACCINATED

Paris, Washington DC, 11.02.2021, 02:19 Time

USPA NEWS - The French Minister of Health, Olivier Veran, gets vaccinated with the AstraZeneca last Monday 4th February, as he was paying a visit to the healthcare team at the hospital of Melun. Today, at the end of the weekly Council of Ministers and the Defense Council, Gabriel Attal, spokesman for the government, explained that: lactation has "little changed for two weeks" He added that "We are still on this same high plateau which appears to have been declining slightly for a week. According to the French government, therefore, containment is not planned for the moment. "There is indeed a way to avoid re-containment. This path is not wide but it exists," continues government spokesman Gabriel Attal. As of February 10, 2021, 3,319 people are in intensive care (-23 in 24 hours) and the number of people hospitalized has started to drop slightly (-216 in 24 hours) The numbers of new cases (+25,387), and deaths (+296) recorded in the last 24 hours are still very high. The number of people admitted to hospital and intensive care has been decreasing for 48 hours. The numbers of cases (+25,387) and deaths (+296) in 24 hours remain very high. The bar of 2,5 Million people vaccinated has been crossed

THE MINISTER OF HEALTH OLIVIER VERAN GETS VACCINATED TO SET AN EXAMPLE-----

The French Minister of Health, Olivier Veran, himself a neurologist by training, was vaccinated on Monday February 8, at Melun hospital, during one of his recent visits by caregivers to encourage vaccination. The minister wished to set an example: "I invite all caregivers to be vaccinated, in their hospitals, town centers, all the structures at their disposal, in order to be able to protect themselves as quickly as possible", a- he told the press after his injection. Still in his educational message, Minister Veran explained that he would return to the Melun hospital in nine to twelve weeks, to receive his second injection. At the launch of the vaccination campaign, he said that "being an example is waiting your turn." "The day it will be open to caregivers under 50 [...], I will be delighted to go get vaccinated and protect myself against this virus," he said a month earlier on January 12. Today it is done. The minister of the senate is the only member of the government who was vaccinated in front of the media cameras, to set an example.

2.5 MILLION COVID VACCINATIONS CARRIED OUT IN FRANCE AS OF FEBRUARY 10, 2021

After a vaccination campaign that started slowly in France on February 10, 2021, nearly 2,500,000 vaccinations were carried out in France. Attached are the cumulative daily data from the Ministry of Health, in the whole country, and the detailed targeted people to be vaccinated in priority.

1. DAILY AND CUMULATIVE VACCINATION DATA

Since the start of the vaccination campaign in France, 2,056,572 first injections of vaccine (i.e. 3.1% of the total population and 3.9% of the adult population) and 443,148 second injections have been carried out (provisional data in awaiting consolidation).

3. WHAT ARE THE PRIORITY AUDIENCES

Vaccinated people are among the priority audiences defined by the health authorities:

§ Elderly people in EHPAD or in USLD (~ 0.6 million people);

§ People over 75 (~ 5.5 million people);

§ All healthcare workers (~ 2.2 million people);

§ Vulnerable people at very high risk of serious forms as mentioned by the orientation advice for the vaccination strategy (~ 0.8 million people);

§ Firefighters (~ 0.3 million people);

§ Home help for disabled or elderly people (~ 0.4 million people);

§ Vulnerable disabled people taken care of in nursing homes and specialized homes (
